## Have You Installed Your Netradyne Camera?

If you have not set up your Netradyne camera, please review the **6 easy steps**:

1) **Install your Netradyne camera.** Steps for self-installation step-by-step are here: Install Netradyne Camera Hardware
   i) If you prefer, or you are having trouble with the self-install instructions, you can contact one of many Netradyne-approved vendors. Remember, the approved vendor install is not included in the purchase price!
2) **Download the Driver-i *Installer* app** to finish pairing your camera with your truck. The username and password are written on the visual aid. Visual aid here. Pairing instructions here.
3) **Download the Driver-i app**, which is *separate from the Installer app above.*

4) **Check your email** to get information for your Netradyne dashboard. Login and ensure you are familiar with it. Your dashboard will automatically be linked with ICSA's account.
5) **Remember to make the monthly payments.** Cameras purchased from the ICSA store have a monthly charge for both hardware and subscription. Payments can be found on the ICSA Member Dashboard under Billing Services.
6) **Watch your Netradyne account** to see any recordings! Use these to ensure that your drivers are driving safely.

As a reminder, to remain in compliance with ICSA's membership requirements, cameras must be installed in all trucks in your fleet.

If you have questions, please reach out to ICSA at cameras@safecarriers.org and we will contact you as soon as possible.
